

# What can an Annual On-Site Maintenance Agreement with TapcoEnpro do for You?

We provide reliable and controlled solutions to managing valve and actuator maintenance, parts management, improved technologies and best practices for your facilities.

## Valve & Actuator Engineering Support

- Any necessary valve and actuator design modifications
- Analysis and reporting of valve and actuator operating data
- Specialized training for Maintenance, Instrument and Operations
- Development of valve maintenance procedures

## Turnaround Planning & Scheduling

- Review in detail the report from last turnaround
- Conduct a “hands on” inspection of the spare parts held in inventory and record their existing condition
- Walk through the unit and determine necessary manpower and equipment requirements
- Perform a risk assessment and develop a safety plan
